First Announcement of the 3rd International Conference on SERS (SERS-2025)

About Conference

The 3rd International Conference on SERS will be held during November 28-30, 2025 in Xiamen, China. This conference aims to bring together scientists working on all aspects of SERS, from all over the world to discuss the development and propose the future direction of SERS. It will also serve as a platform for the reunion of old friends.

Topics and Scope

This conference will cover all aspects of SERS and its application in various fields, such as electrochemistry, bioscience, material science, energy storage and conversion, and analytical Science, including but not limited to:

- Mechanism
- Electrochemistry
- Bioscience
- Catalysis
- Energy Storage and Conversion
- Materials
- Daily Life
- Tip-Enhanced Raman Spectroscopy
- Shell-Isolated Nanoparticle-Enhanced Raman Spectroscopy
- Plasmonics and Plasmonic Materials
- Plasmon-Enhanced Spectroscopy (IR, Fluorescence, SFG, and other Spectroscopies)
- Others

Conference Format

The official language of the conference will be English. The conference will remain a single session format and will have plenary talks, keynote talks, invited talks, oral presentations, and poster presentations. **Best Poster Awards** will be presented to the best

poster presenters during the conference. More information about invited talks can be found on this website.

Other matters
