About
IPA 2025

The International Photodynamic Association (IPA) was founded in 1986 to support and endorse the scientific advancement and clinical development of photomedicine, in particular in the areas of photodynamic disinfection, photodynamic therapy (PDT), photodynamic immunotherapy (PIT), and photodiagnosis (PD).

The IPA organizes a Biennial World Congress, providing members and non-members a unique opportunity to share and learn more about global developments and research in photodynamic therapy, photodynamic immunotherapy and photodiagnosis. The 19th IPA World Congress will be held at the Shanghai International Convention Center in Shanghai, China, June 10-16, 2025.

Photodynamic therapy in dermatology

Abstract: Photodynamic therapy (PDT) has been applied in dermatology for more than 30 years. The widely accepted mechanism of PDT are generally classified into three aspects: 1) Direct cytotoxicity to target cells through the generation of ROS; 2) Destruction of the tissue microvascular system; 3) Induction of an inflammatory response and further activating the immune system. Topical 5-aminolevulinic acid (5-ALA)-PDT have been approved in Europe and the United States for
