# International Forum on Sustainable Mineral Supply Chains

Week of Sustainable  
Supply Chains

Rule change and governance  
improvement in new era

Registration

# 01 Background of the event

SMISC Forum  
可持续矿产供应链国际论坛  
INTERNATIONAL FORUM ON SUSTAINABLE MINERAL SUPPLY CHAIN

SMISC week  
供应链可持续发展周

Despite all parties' efforts to achieve compliance governance of minerals supply chain, we noticed that many issues of supply chain governance still exist:

What are the boundaries and issues of compliance governance in mineral supply chain?

What market recognized methods can companies use to implement due diligence management in the supply chain?

How can upstream and downstream companies collaborate to manage risks?

How to avoid double review and ensure that business information is not leaked?

How to promote benchmarking and mutual recognition of international standards?

How to control supply chain risks at both the symptom and root level?

What role do multilateral organizations, government agencies and non-governmental organizations play?

What role should Chinese companies play and how can they actively participate in supply chain governance?

# 02 Basic information of the event

WWF (World Wide Fund for Nature) is one of the world's largest and most respected independent organizations dedicated to the conservation of nature. Since the first office was founded in Switzerland in 1961, WWF has grown into a global network active in more than 100 countries with almost five million supporters.

WWF has been active in China since 1980, when it was invited by the Chinese government as the first international NGO to work on nature conservation. The Beijing office opened in 1996, and there are now 8 additional field programme offices spread across China.

The Department for International Development (DFID) was set up in 1997. DFID leads the UK's work to end extreme poverty. DFID is tackling the global challenges of our time including poverty and disease, mass migration, insecurity and conflict. It's work is building a safer, healthier, more prosperous world for people in developing countries and in the UK too.

**proforest**

Proforest is a non-profit international environmental protection organization dedicated to the consulting and cooperation about sustainable production, responsible sourcing, supply chain management in forestry and agriculture sector. Established in 2000, it is headquartered in the United Kingdom and has offices in Brazil, Ghana and Malaysia, Indonesia and Colombia.
