

## Invitation Letter for

The 6th International Conference on Big Data and Information Analytics

Dear Mr./Ms. \_\_\_\_\_:

We have the great pleasure, on behalf of the Program Committee and Organizing Committee, of inviting you to contribute to the 6<sup>th</sup> International Conference on Big Data and Information Analytics (BigDIA 2020) to be held in Shenzhen, China, from December 4 to December 6, 2020. Updated information on the program activities is available at the conference website: <https://bigdia2020.scimeeting.cn>.

The conference brings together research scientists from academia, industries, and government agencies to report progress and exchange ideas to address challenges in fundamental research and rapid knowledge translation in collecting, processing, analyzing, integrating, annotating and visualizing Big Data for scientific exploration and business decision-making. The conference will consist of plenary sessions, invited sessions and contributed sessions. Our primary goal is to promote interactions and collaborations among all scientists, researchers and practitioners who develop data science theories, algorithms and methods to deal with and analyze Big Data from different perspectives such as computer science, statistics, engineering, informatics, mathematics and other quantitative/computational sciences as well as domain-specific disciplines.

All speakers and presenters are required to register on the official website before November 23th, so as to print the conference brochure. All speakers are expected to cover your own travel expenses and local accommodations. You may also encourage your students, postdocs and other trainees to register and attend the conference.

We sincerely hope that you could accept our invitation. And we will be looking forward to your reply.

Sincerely yours,

Zhibin Yu, PhD

Shenzhen Institutes of Advanced Technology, CAS, China

On behalf of the Organizing Committee: Zongben Xu (Xi'an Jiaotong University, China), Jianhong Wu (York University, Canada), Songyang Lao (National University of Defense Technology, China), Weidong Bao (National University of Defense Technology, China), Hulin Wu (University of Texas HealthScience Center at Houston, USA)
