

SEPTEMBER 25–28
JW MARRIOTT HOTEL YINCHUAN
NINGXIA, CHINA

2023 CHINA ALUMINUM WEEK

(Initial Programme)

HOSTED BY:

China Nonferrous Metals Industry Association

CO-HOSTED BY:

State Power Investment Corporation

SPECIALLY CO-HOSTED BY:

Chinalco

Shandong Weiqiao Pioneer Group Co., Ltd.

ORGANIZED BY:

Beijing Antaiko Information Co., Ltd

**FIND INFINITE BUSINESS OPPORTUNITIES IN AN
ALUMINUM TRIP**

Please refer to: <http://www.antaiko.com>

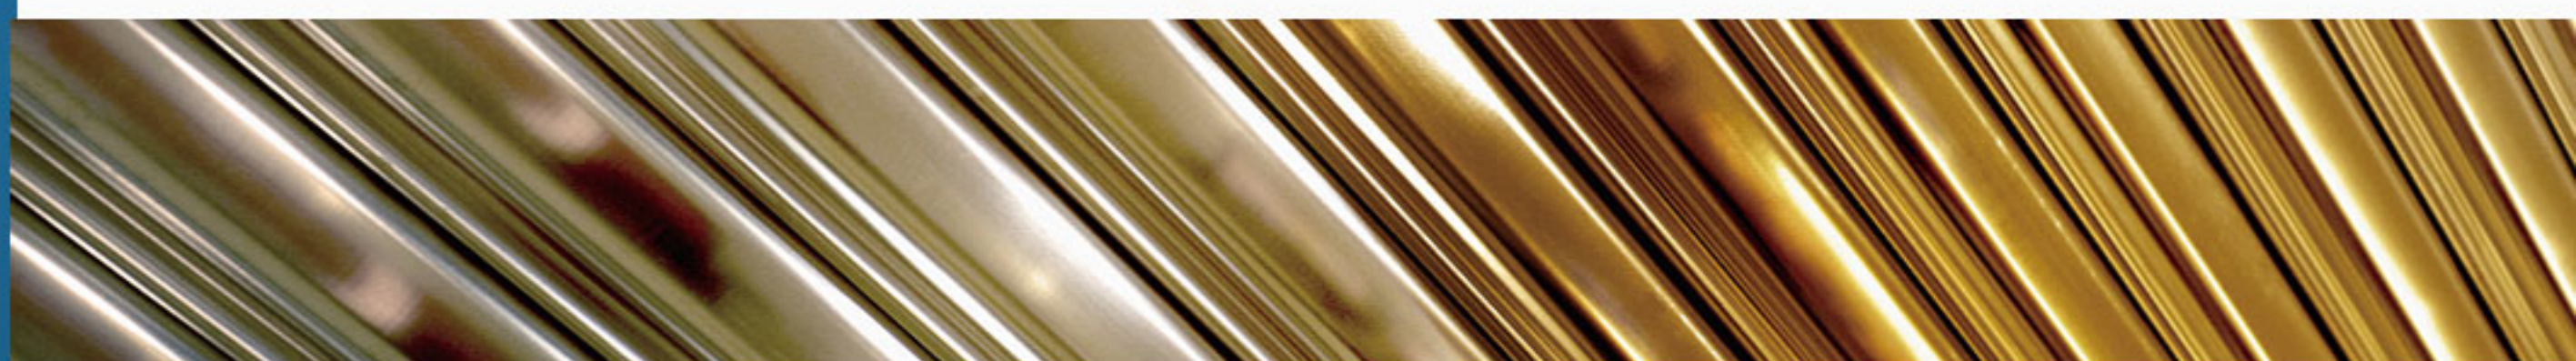

Specially Co- host to be invited

China Minmetals Non-ferrous Metals Co., Ltd.	Shanghai Futures Exchange
Shandong Nanshan Aluminum Co., Ltd.	Xinfa Group
Hangzhou Jinjiang Group.	Yunnan Aluminum Co., Ltd.
JISCO Gansu Dongxing Aluminum Co., Ltd.	SUNSTONE Development Co., Ltd.
Yidian Holding Group Co., Ltd.	Henan Shenhua Group Co., Ltd.
Wining International Group	Qianhai Mercantile Exchange
Shandong Innovation Group	Bosai Group
Yulin New Materials Group Co., Ltd.	Henan Zhongfu Industrial Co., Ltd.
Rusal	Novelis
Alcoa	Rio Tinto
Hydro	Emirates Global Aluminum
Chongqing Xipeng Industrial Park	Tianshan Aluminum Group Co., Ltd.
Shanxi Liangyu Carbon Co., Ltd.	Hunan Phohom New Material Technology Co., Ltd.
Shandong Shengquan New Materials Co., Ltd.	Mengtai Group Co., Ltd.
People's Government of Wenshan Zhuang and Miao Autonomous Prefecture	
People's Government of Honghe Hani and Yi Autonomous Prefecture	
Luzhou Laojiao Co., Ltd.	Sichuan Aostar Aluminium Co., Ltd.
RX	Liulin Senze Coal & Aluminum Co., Ltd.
LONGI Green Energy Technology Co., Ltd.	Glencore
Founder CIFCO Futures Co., Ltd.	Jiangsu Zhongshang Carbon Research Institute Co., Ltd.
Xiamen Xiangyu Group Co., Ltd.	Topsun International Industrial Limited
Trafigura Investment (China) Co., Ltd.	Do-Fluoride New Materials Co., Ltd.
Shanghai Shengda Supply Chain Management Co., Ltd.	

Supported by

China Nonferrous Metals Fabrication Industry Association	
International Aluminium Institute	Japan Aluminium Association
Shandong Aluminum Industry Association	Binzhou Aluminum Industry Association

In 2023, the overall global economic situation is not optimistic, with financial markets experiencing turbulence and geopolitical conflicts continuing, adding further uncertainty to the world in this century's unprecedented major changes. Facing the complex macroeconomic situation, China's aluminum industry is earnestly implementing top-level designs for carbon peak and carbon neutrality. It continues to deepen supply-side structural reforms, insists on independent innovation, enhances green and intelligent development levels, strengthens cooperation between upstream and downstream sectors, and accelerates the establishment of a new development paradigm.

The new development stage also poses new challenges for the global aluminum industry. While those resource-rich countries strengthen value chain extensions, how to ensure a stable supply of bauxite on a global scale? Despite numerous new alumina projects, how can high-cost production capacity be rapidly phased out through market-oriented approaches? International cooperation in aluminum smelting capacity is accelerating; can Southeast Asia become a new supply growth point? With increasing economic downward pressure, can China's economy revitalize the global aluminum market? As energy prices decline, will aluminum prices return to a normal fluctuation range? Accelerating the transition to green and low-carbon practices, how can we solve the global challenge of disposing of red mud?

2023 China Aluminum Week will adhere to the principle of communication, cooperation, mutual benefit, and win-win, aiming to establish a long-term cooperative platform for the global aluminum industry in terms of resources, production, application, and trade.

Conference Agenda

Date	Time	Activities	
Sep.25	12:00-22:00	Registration	
Sep.26	08:30-22:00	Registration	
	13:30-17:30	Seminar on Carbon and Aluminum Auxiliary Materials Market	
Sep.27	09:00-17:00	2023 China Aluminum Forum	
	19:00-21:00	Pan Pacific Aluminum Industry Business Buffet	
Sep.28	09:00-12:00	Pan Pacific Aluminum Industry Summit	CEO Dialogue
	14:00-18:00		Alumina & Aluminum Market Salon
			Green and Low Carbon Session

Session one

Seminar on Carbon and other Materials Used for Aluminum Smelting

13:30-17:30 September 26

Hosted by :

- Beijing Antaike Information Co., Ltd
- Carbon Branch of China Nonferrous Metals Industry Association
- Jiangsu Zhongshang Carbon Research Institute Co., Ltd.

Keynote Speeches

- Report from Chinalco
- Report from Sunstone
- Development Prospects of Superconducting Cathode for Aluminum Reduction Cells (Shanxi Liangyu Carbon Co., Ltd.)
- Practice of Intelligent Upgrade of Carbon Production System (Jiangsu Zhongshang Carbon Research Institute Co., Ltd.)
- Analysis of the Impact of Carbon Materials on Aluminum Energy Consumption (Chinalco Zhengzhou Nonferrous Metal Research Institute Co. Ltd.)
- Innovative Development of Fluorine Materials (Do-Fluoride New Materials Co., Ltd.)
- Plan and Example Sharing of Intelligent Manufacturing of Carbon for Aluminum (Beijing Inspect Technology Co., Ltd.)
- Analysis and Outlook of China’s Aluminum Carbon Market (Beijing Antaike Information Co., Ltd)

The above reports and honored guests are now being invited

Session Two

2023 China Aluminum Forum

09:00-17:00, September 27

Hosted by :

China Nonferrous Metals Industry Association

Opening Remarks by:

- China Nonferrous Metals Industry Association
- Officials from relevant national ministries and departments of the government
- Chinalco
- State Power Investment Corporation
- Shandong Weiqiao Pioneering Group Co., Ltd.
- International Aluminium Institute
- People's Government of Ningxia Hui Autonomous Region

Keynote Speeches

- Promote Chinese Modernization with the Construction of Aluminum Industrial Modernization System
- Global Macroeconomic and Commodity Market Outlook
- Report by Chinalco
- Report by State Power Investment Corporation
- Report by Shandong Weiqiao Pioneering Group Co., Ltd.
- Emission Reduction Roadmap of Global Aluminum Industrial Chain
- Development Prospects of the Global Aluminum Industry
- Report by Rusal
- Development Trends of Aluminum Industry in the Gulf Region
- Global Outlook for Alumina and Aluminum Markets

The above reports and honored guests are now being invited

Session Three

Pan Pacific Aluminum Industry Summit
Business Buffet

Hosted by :

19:00-21:00, September 27

Beijing Antaike Information Co., Ltd

To establish a cooperation and communication platform for insiders of global aluminum industry, Buffet Banquet of Pan Pacific Aluminum Industry Summit welcomes your visit for social networking with more than 1000 attendees.

Pan Pacific Aluminum Industry Summit

1

CEO Dialogue Session

09:00-12:00, September 28

Resource Guarantee: How to Optimize Bauxite Layout Globally

Avoid Surplus: How to Facilitate the Orderly Phasing-out of High-Cost Alumina Capacity?

Comprehensive Utilization: How to Achieve Low-Cost Disposal of Red Mud and Aluminum Ash Residue?

Transformation and Upgrading: How can Aluminum Enterprises Extend and Supplement the Value Chain to Achieve High-Quality Development?

Stable Exports: How to Realize High-level Exports of Aluminum semis and Products

2

Alumina & Aluminum Market Salon

14:00-16:00, September 28

Keynote speeches

Trading of alumina and primary aluminum futures contracts
(Shanghai Futures Exchange)

Salon:

CHINA FUTURES CO.,LTD., Chinalco, Antaike, COFCO Futures

Green and Low Carbon Session

16:00-18:00, September 28

Keynote speeches

Decarbonization of Electricity: How can the Aluminum Industry Implement Energy Transformation?

Energy-Saving Technologies: How to Harness the Potential of Technological Energy-Saving and Carbon Reduction?

End to End Recycling: How can the Integration of Secondary Aluminum with Aluminum Fabrication Promote Sustainable Development?

Low-Carbon Assessment: How can Standards and Regulations Guide the Aluminum Industry's Low-Carbon Transformation?

Green Applications: How can Aluminum Showcase its Green Value in End-Use Applications?

China Aluminum Week Overview

China Aluminum Week is an internationally renowned brand event created by China Nonferrous Metals Industry Association, building on the global impact of China Aluminum Forum. The forum was established in 2002, hosted by China Nonferrous Metals Industry Association, and organized by Beijing Antaike Information Co., Ltd. It has been successfully held for twenty-one consecutive years. As the largest, most prestigious, and most influential professional event in China's aluminum industry, China Aluminum Week remains committed to its core mission of the Grand Gathering of China Aluminum Industry, Flashing Event for World Aluminum Community. It serves as an important platform for fostering domestic and foreign industry cooperation, facilitating trade and investment, exchanging technological insights, and analyzing market trends. Participants in this event come from diverse sectors of the aluminum industry, including production, trade, applications, research, finance, etc. It is an annual gathering of elite and leaders in the aluminum industry with an attendance of over 1000 people and is recognized as the Industrial Grand Event and Bellwether for the global aluminum sector.

Over the past twenty-one China Aluminum Week has been held in twelve provinces and autonomous regions across China. In 2023, it will take place in Ningxia for the first time, becoming an important international conference for the aluminum industry. The event extends a warm invitation to aluminum industry colleagues from both domestic and international delegates to join in Yinchuan and collectively discuss the future path of the aluminum industry.
