As global climate change and population growth, Asian countries face urgent water demand in agriculture, industrialization, urbanization and public services. Many Asian countries and regions are currently grappling with unprecedented water resource predicament such as decline of undergroundwater level, insufficient ecological flows and water pollution. To address these challenges, it is necessary to strengthen the water resource conservation and intensive utilization, enhance the efficiency and effectiveness of water resources utilization. Therefore, establishing and improving water institution can promote the sustainable utilization of water resources, facilitate the sustainable development of economy and society and bring benefits to Asia.

随着全球气候变化以及人口的不断增长，亚洲国家在农业发展、工业化、城镇化和改善人民生活等方面对水资源形成迫切需求，加之所产生的地下水水位下降、生态流量不足、水环境污染等负面影响，使得许多国家和地区正遭遇前所未有的水资源困境。为应对挑战，需强化水资源节约集约利用能力，有效提升水资源利用的效率和效益。建立健全水资源管理的体制机制和制度体系，有助于加强水资源节约与保护，推动水资源实现可持续利用，促进经济社会可持续发展，为亚洲各国带来福祉。
