

WATER CEO ROUNDTABLE

Water Project Business Forum-1

🕒 14:00-16:00, 24 September 2024, Tuesday
📍 Beijing International Convention Center, Hall 2-A

Currently, the world is witnessing frequent extreme weather events, global water enterprises face unprecedented opportunities in ensuring high-quality development and water security. By participating in transnational cooperation projects, water enterprises could expand their market influence and accumulate experience in technological innovation and management practices. However, they also face with management and cooperation challenges due to diverse cultural and legal environments and the complexity of project execution.

THEME: Enhancing High Quality Development to Ensure Water Security — Opportunities and Challenges for Water Enterprises
